

NIÑO NIEL IROC

Full Stack Developer

+63 995 385 6593 | iroc.niel123@gmail.com | LinkedIn | Github | Cagayan de Oro, Misamis Oriental, PH

Professional Summary

Full Stack Developer with 3+ years of experience building and shipping production applications across the entire stack — from React and TypeScript frontends to Laravel backends with PostgreSQL. Delivers reusable UI components, RESTful and third-party API integrations, authentication systems, and scalable server-side services in Agile, cross-functional teams. Brings a disciplined approach to clean code, security best practices, and end-to-end ownership from requirements to deployment.

Professional Experience

Software Engineer | Syntactics Inc

June 2022 – Present | Cagayan de Oro, PH

- **React & TypeScript Frontend Development:** Built and maintained production UI components and application modules using React and TypeScript — delivering responsive, reusable frontend features across multiple projects from personal builds to client-facing production systems, with work as recent as 2025.
- **Laravel Backend Services:** Engineered server-side application modules using PHP/Laravel — implementing business logic, data models, RESTful API endpoints, and backend services that supported large-scale production datasets across multiple release cycles.
- **Authentication Implementation:** Implemented authentication systems as a standard foundation across Laravel projects — covering token-based auth, session management, and access control to secure user data and application endpoints in production environments.
- **API Integration:** Integrated third-party APIs and services — including Stripe (payments), Vonage (SMS), and Google Maps (location) — building the API integration patterns directly applicable to Auth0 flows and external service connections.
- **Database Design & PostgreSQL:** Designed and implemented schemas, queries, and data interactions across PostgreSQL, MySQL, and MongoDB; applied security hardening and query optimization to maintain reliability and performance across high-volume data environments.
- **Frontend Component Development (Vue.js):** Developed a product module using Vue.js for a production project — building self-contained, data-driven UI components integrated with backend APIs, demonstrating cross-framework frontend component experience.
- **Code Quality & Agile Delivery:** Authored API specifications and architecture documentation; conducted code reviews enforcing secure and optimized codebases; collaborated with frontend, AI, and DevOps teams through Agile sprints with CI/CD deployment on AWS infrastructure.

Skills

Languages	TypeScript, JavaScript, PHP, SQL, HTML, CSS
Frontend	React, Vue.js, Material UI
Backend	Laravel, NestJS, Express.js
Databases	PostgreSQL, MySQL, MongoDB
Cloud & DevOps	AWS, Docker, Kubernetes, CI/CD pipelines, Git, Bash
Tools	Postman, Jira, VSCode

Education

Bachelor of Science in Information Technology (BSIT)

University of Science and Technology of Southern Philippines — Aug 2022
